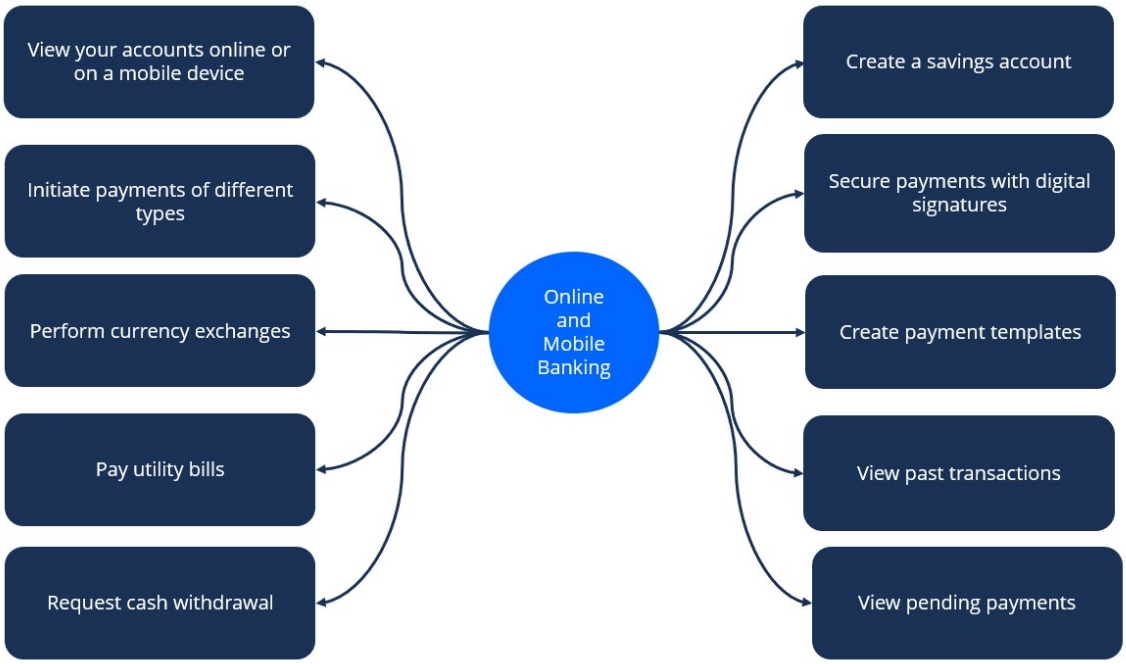
Overview

The Online and Mobile Banking solution grants individual and business users access to their accounts online. As a user, you can perform financial tasks such as view account balance and transaction history, create a payment, exchange money, message the bank, pay bills, and more. The solution offers both desktop and mobile-friendly user interfaces for accessing your accounts from anywhere, at any time.

The following significant banking operations are available to end-users:



This user guide describes the above operations for non-technical users, retail or corporate customers of a bank.

Access Online and Mobile Banking

As a bank customer, you can enroll into the Online and Mobile Banking solution and get access to your personal account as well as to corporate ones following a few steps.

Ways to Enroll

You can register as an Online and Mobile Banking user:

- online, as part of a product origination journey (such as a Buy Now, Pay Later solution, new deposit opening, etc.)
- through a registration process in a bank branch.

Types of Rights

Based on your requirements as a customer, during the enrollment process the financial institution can choose to set up the following rights for you:

- view rights for all or some accounts/products
- rights to perform all transaction types from liabilities accounts (current accounts, savings, etc.) or only some of them (domestic payments, foreign currency payments, etc.)

- thresholds for transaction amounts (by transaction, by day, by week, by month, by channel)
- joint signature rights.

Specific access rights are given at bank branches by bank employees after you make an online request and create your credentials.

Register for an Account

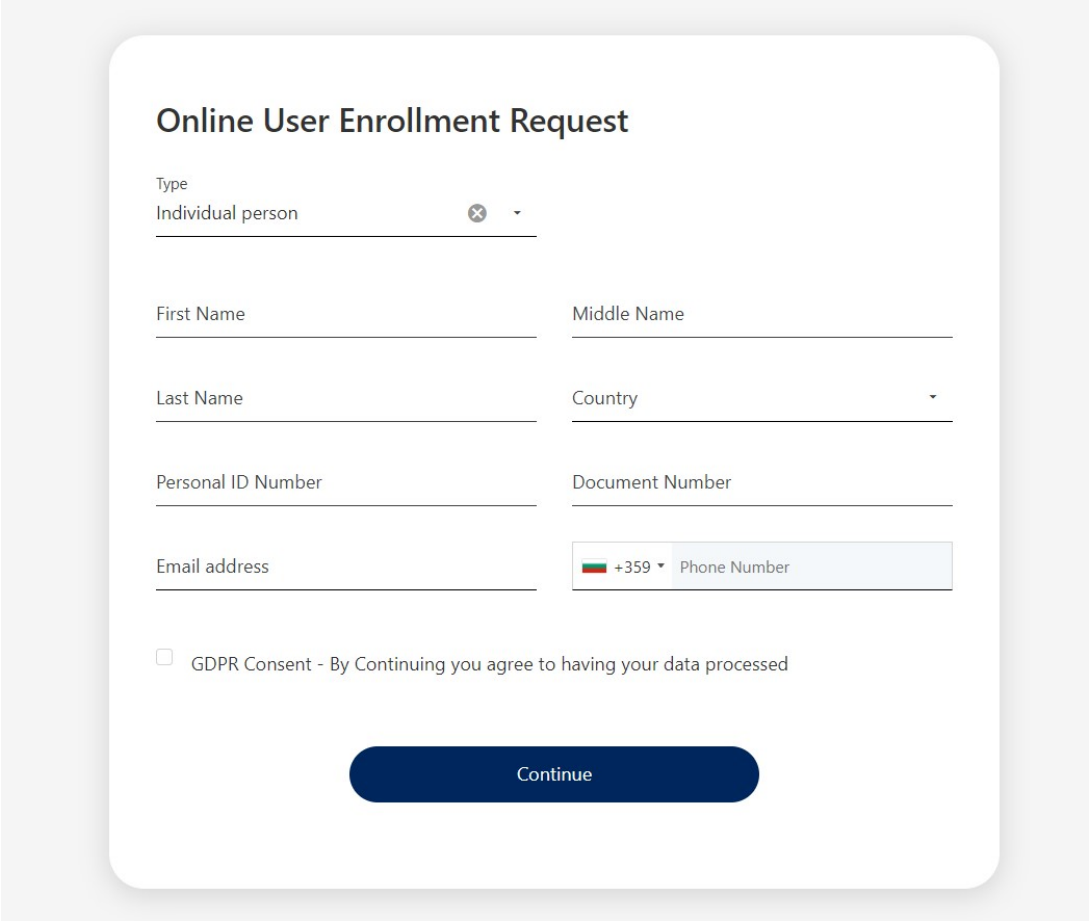
To get access to the Online and Mobile Banking, you must:

1. register a request online
2. go to a bank branch to activate the account.

Depending on the bank, if you already have an account for a legacy online banking solution, you can migrate it using the steps detailed in the User Migration page.

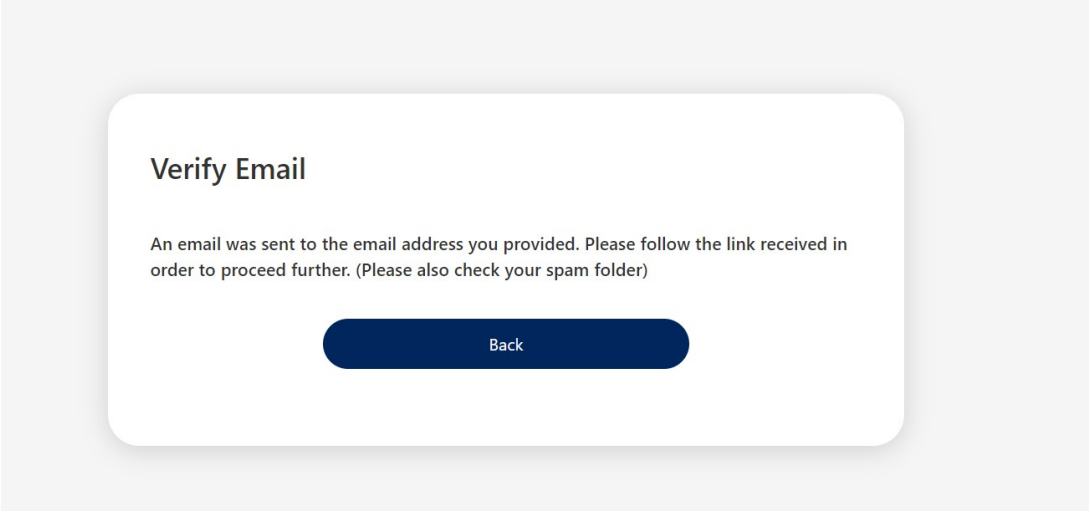
Follow the steps below to register in the Online and Mobile Banking solution:

1 Complete an Online Form



1. Access the link to the online form and fill in the required information. If you are not a resident of the country where you are applying for, you have to provide a document/identification number, e.g., passport.
2. Click the **Continue** button. The **Verify email** screen is displayed informing you to check the email address you previously provided, and open the link in the email.

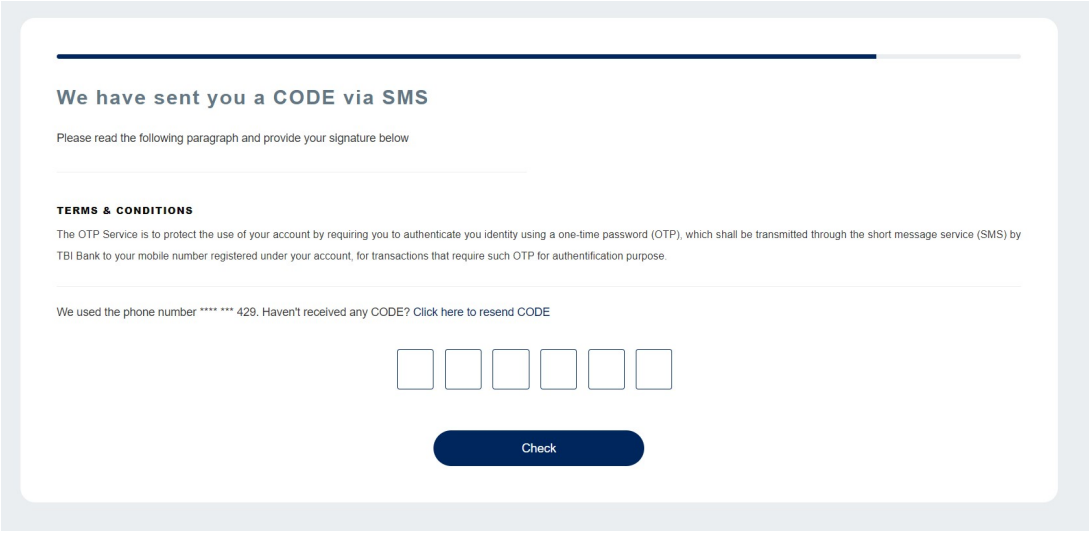
2 Verify the Email Address and Phone Number



3. Navigate to your email and open the email received. Access the link from the email to verify your email address. The page **Online User Enrollment Request** is displayed informing you that the email address provided was validated, and an SMS is going to be sent to validate the phone number as well.

   To change the phone number, click the **Change phone number** button and insert the new **phone number** A code is sent to that number.

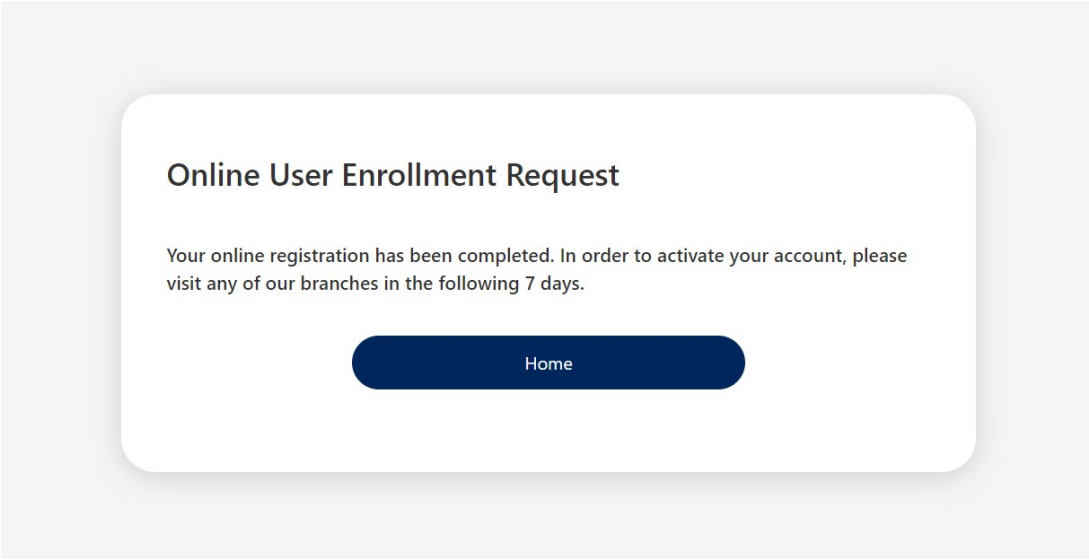
4. Click **Send Code**. Check your mobile messages and insert the code. To resend the code, click **Click here to resend code**.



5. Click the **Check** button.

3 Create a Username

6. The page **Online User Enrollment Request** refreshes informing you to select your desired credentials for "Log in to Online and Mobile Banking" on the next page.
7. Add a username and set a password. Click **Confirm**. A page opens informing you that for the Online and Mobile Banking service to be activated you need to visit any branch in the following 7 days.



Migrate Your Previous User Account

This process transfers you from the legacy internet banking service of the bank to the FintechOS Online and Mobile Banking solution.

1. Access the Online and Mobile Banking solution and insert the old username and password. Click **Validate**.

2. If the credentials are confirmed, a One-Time-Password (**OTP**[1]) is sent to your phone number. Insert the code into the OTP field. Once inserted, click **OTP Verification**.
3. After the code is checked, the page informs you to visit any of the branches to continue the registration in the following 7 days.
4. On this page, insert a username for logging into Online and Mobile Banking. By default, the application displays the phone number as username. It is automatically generated, but you can modify it.

   Next, you need to set a password and confirm it by inserting it twice.

   Once the process is successful, the system informs you that the registration online was completed.
5. Click the **Home** button.

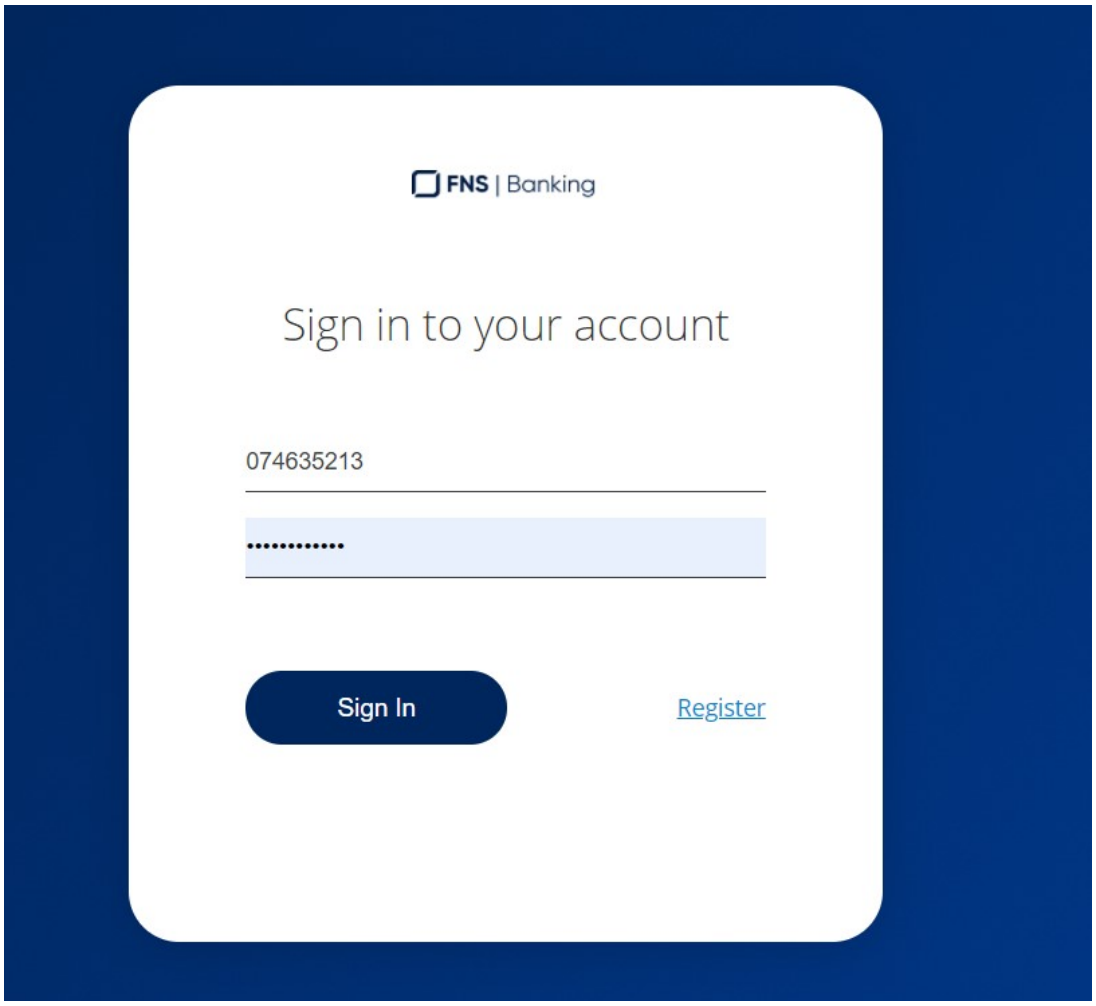
Log in to Online and Mobile Banking

After you've successfully registered for an account to the Online and Mobile Banking solution by following the steps detailed in the Register for an Account page. Depending on the type of accounts you have and the way access was set up for you, you can use a single username and password for both your individual and corporate accounts, or separate sets of credentials for the two.

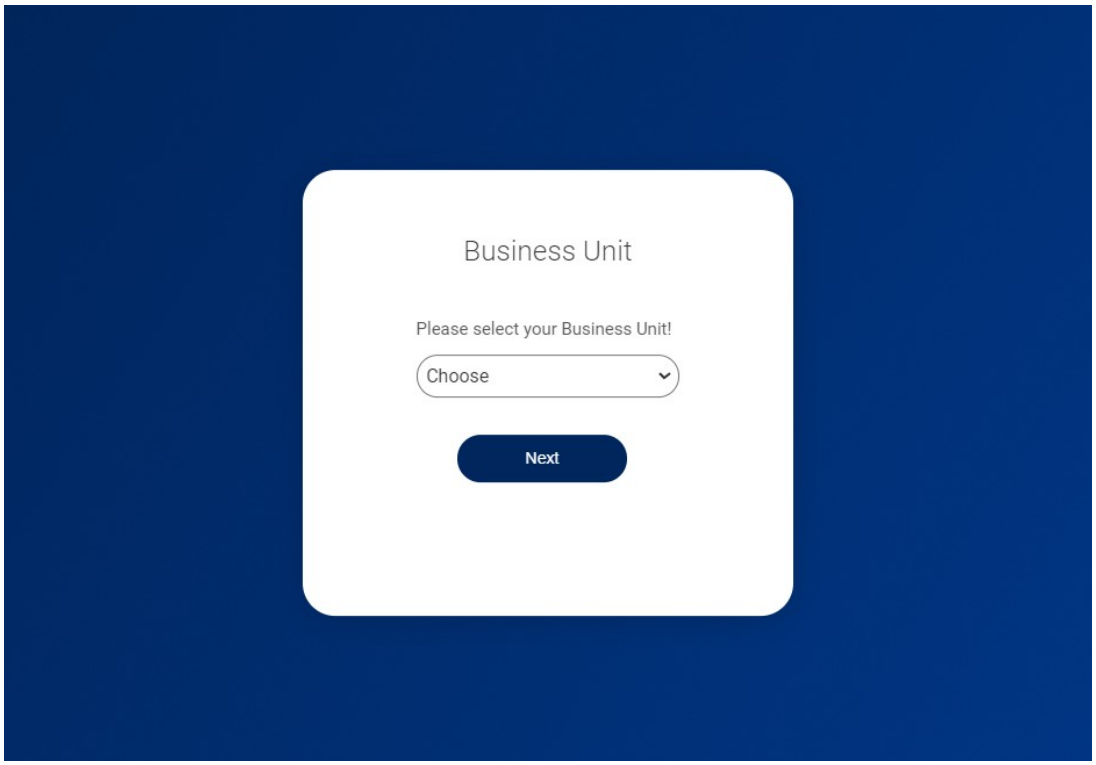
Follow the instructions below to log in to the Online and Mobile Banking application:

1. Access the Online and Mobile Banking and insert the **username** or email address and **password**. Click **Sign in**.

[1]One-Time-Password. It is a password generated by the system to validate a piece of information or sign a document.



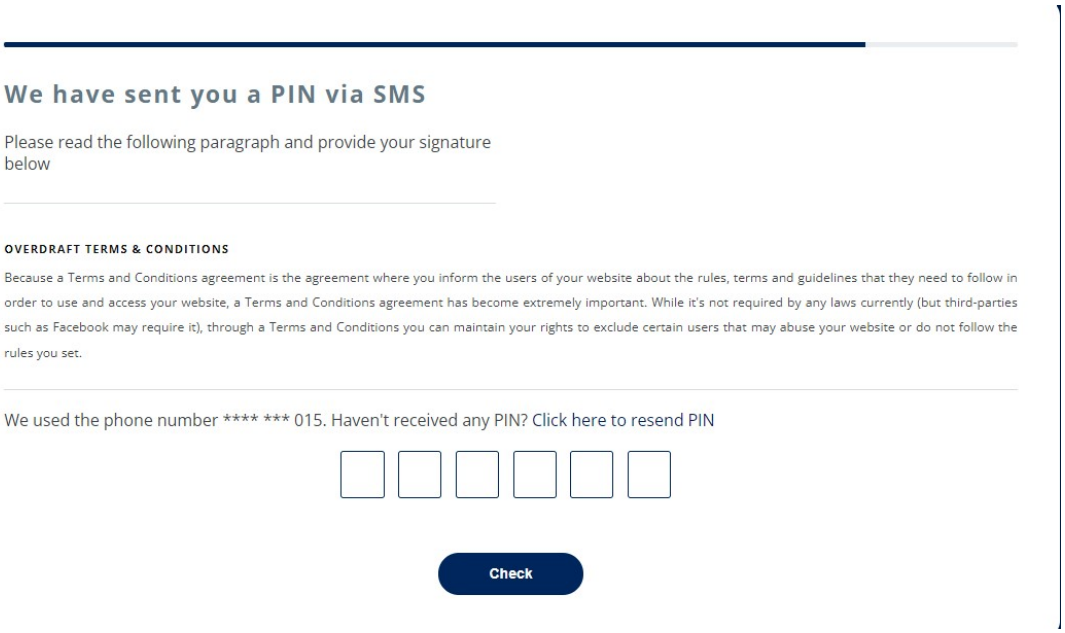
2. A SMS was sent to your phone number with a code to be inserted in this page. Insert the code and click **Next**.
3. Choose the **Business Unit** from the drop-down field, the customer for whom the login is made. This screen is available for users with access to multiple customers with only one set of credentials. Selecting a business unit is essential for security reasons.



4. Click **Next** and you are now logged in to the Online and Mobile Banking.

Changing your Password

1. Click the key icon. The page **We have sent you a PIN via SMS.** is displayed informing you that a OTP was sent to your phone number.



2. There are six boxes. Insert the six numbers in each box. This is required to verify your identity.

   If you did not receive the SMS, click **Click here to resend PIN**.

3. After you inserted the code, click **Check**. The page **Change Password** is displayed with the password policy.

4. Add your old password and the new one. Click **Change password**.

Make Online Payments and Transfers

Money transfers and payments are some of the main activities in any online banking application. Such operations are available in the Online and Mobile Banking solution, which automatically validates the accounts and IBANs you add, fills in the bank name and details, verifies the transfer options and displays the expected date at which the money reaches the beneficiary account, as well as the fees.

Transfers are performed in three steps:

- fill in the beneficiary account and amount
- review the details
- sign off on the payment.

Types of Transfers and Payments

- **Local currency payments**: transferring between own accounts (same currency) or to another beneficiary within the same or other financial institution.
- **Foreign exchange**: exchange money between your accounts digitally.
- **International and foreign currency transfers**
- **Beneficiaries and payment templates**: set up templates for quick recurring transfers.
- **Utility payments: pay your utility bills**: the list of utility providers is administered by the bank.
- **Bulk payments:** send transfers to multiple recipients at once, either for paying salaries to your employees or other situations in which such transfers are made.

Order List and Multiple Authorizations

The Order List helps you have a clear history of every payment and transfer made within the app. It also serves as a central point for SMEs and corporate customers, which rely on joint signatures for payment authorization, to see and be able to sign a transfer already inputted or signed by a peer within the company.

Queue Payments

For small companies that need to receive payments from a customer to pay other suppliers, the solution offers the possibility to queue payments while waiting for funds to reach the account, in case of insufficient balance. Rather than making the user log in several times on the same day to view the balance and only then to initiate the payment, the solution allows you to initiate a payment without the necessary balance. The system waits for the account to get the necessary funds, and then processes the payment.

Accessing Payments

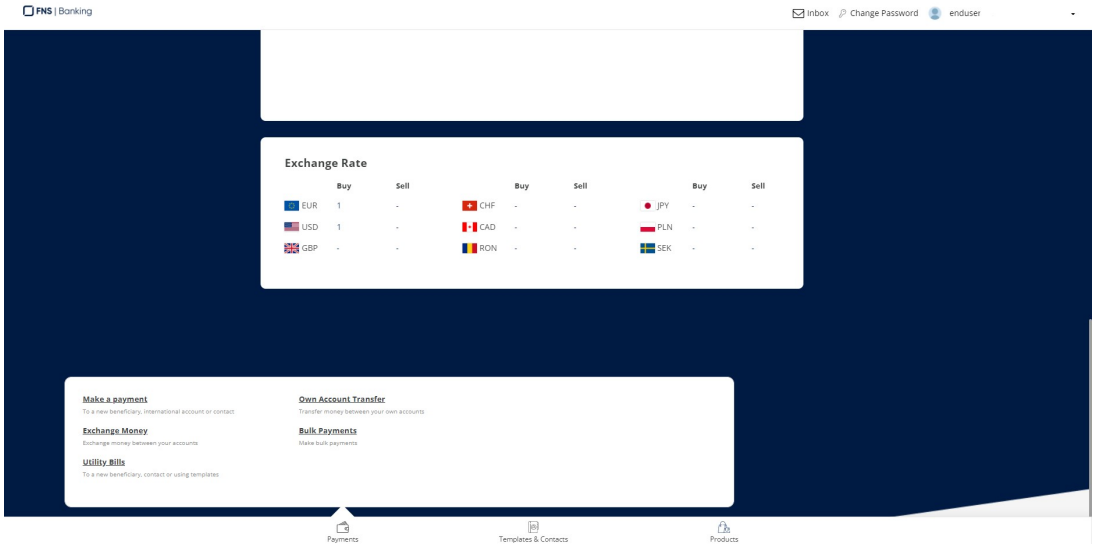
Click **Payments** on the footer to initiate a payment. A pop-up opens with the following types:

- **Make a payment**.
- **Utility Bills**.
- **Exchange**.
- **Own Account Transfer**.
- **Bulk payments**.

Make a Transfer

Follow the steps below to make a transfer:

1. From the homepage (or from the account details) select **Payments**.

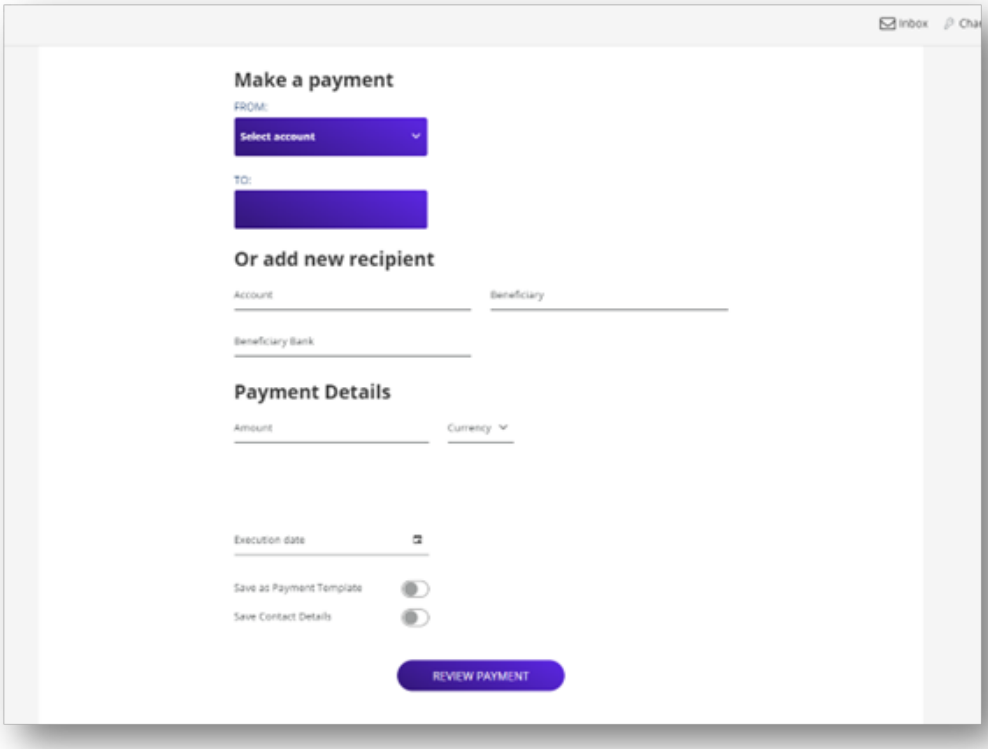


2. Select **Make a Payment** from the list of options.
3. Select the account from which you want to send the funds.
4. Paste or input the account number/IBAN of the person/business you want to send the funds.
5. Fill in their name.
6. Fill in the amount and select the currency.

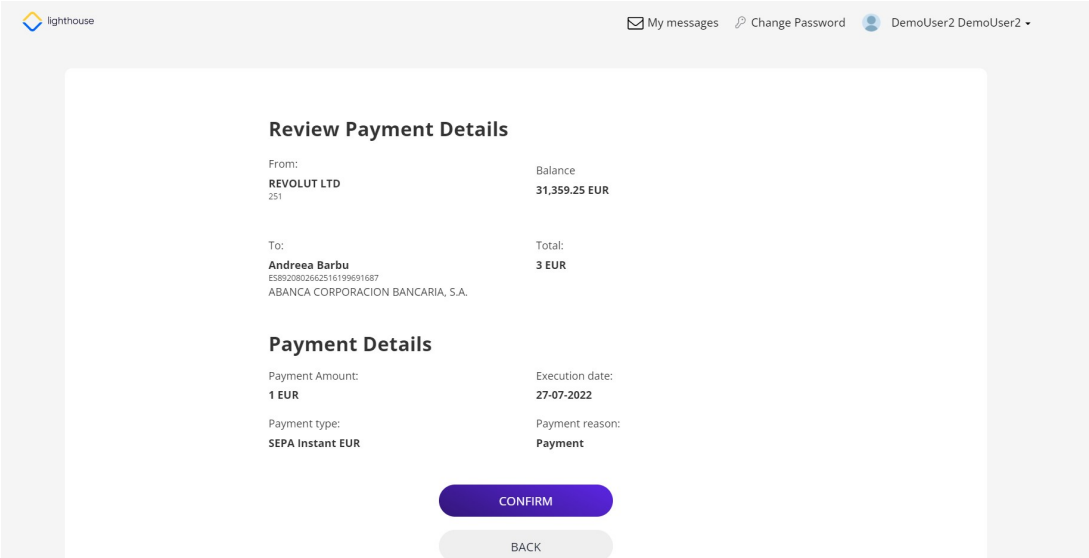
   Depending on the type of the payment (automatically identified by the system), you are required to at least:

- Fill in the transaction details
- Verify any fees applicable (they are displayed on the screen). In certain cases you can choose different arrival time of the amount, which might incur different fee values. Everything is in your control to choose.

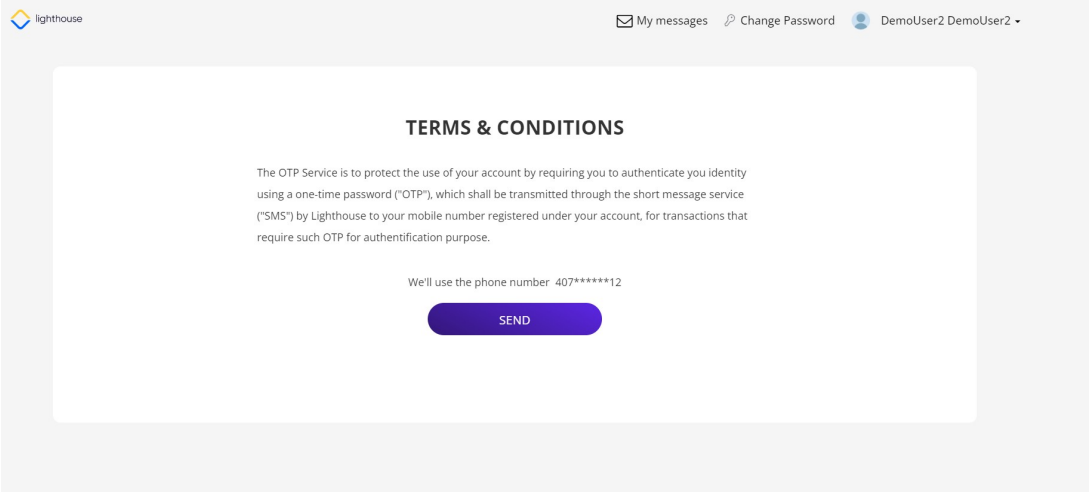
7. Click **Review payment**.



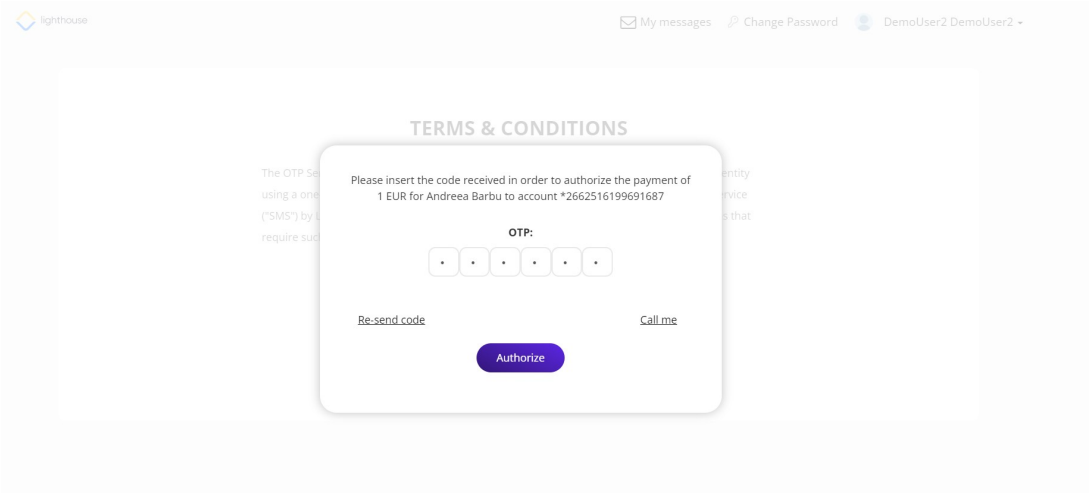
8. Check the details and click **Confirm**.



9. An SMS is sent with an OTP. Click **Send**.

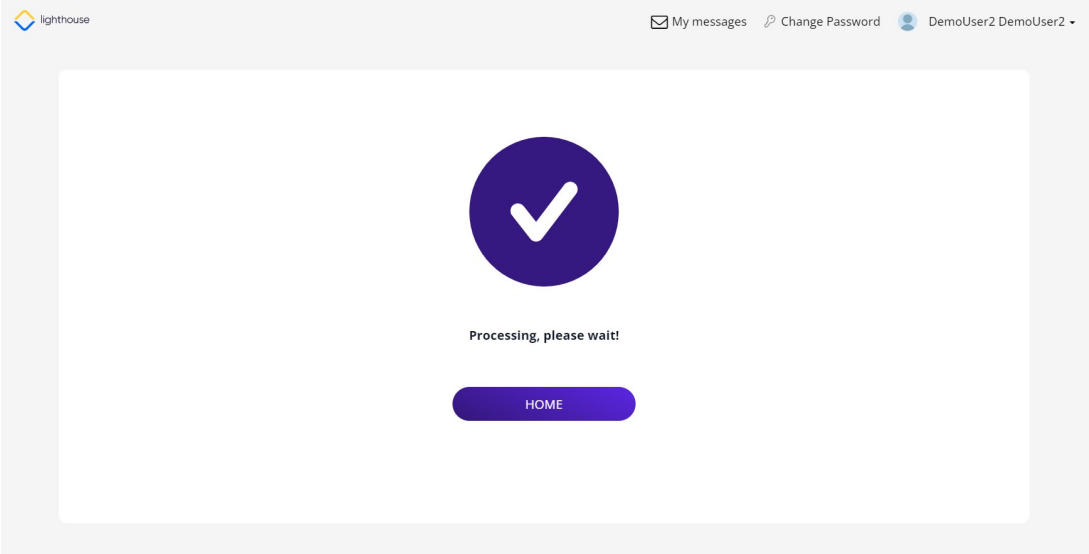


10. Insert the OTP.



11. Click **Authorize**.

12. A confirmation screen is displayed. Click **Home** to return to the home screen.

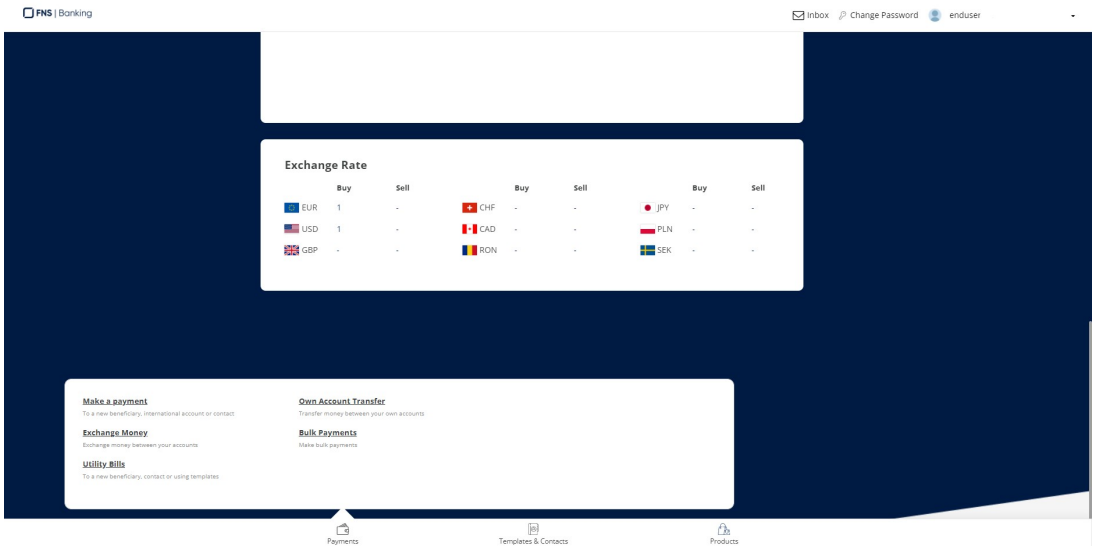


Use a Transfer Template

A beneficiary template is a draft of a payment where the information about the receiver of the funds is already saved from a previous transaction.

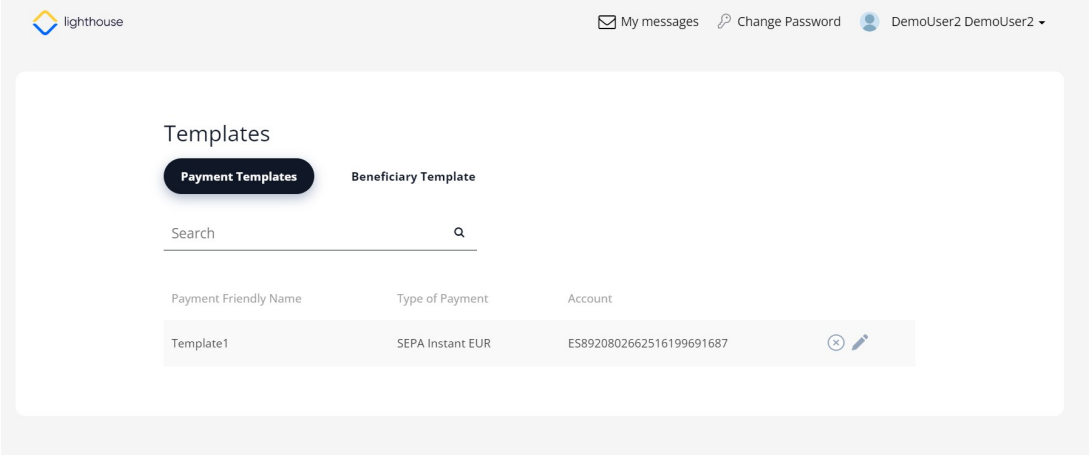
Follow the steps below to use a template to make a transfer:

1. On the Online and Mobile Banking homepage, scroll down to the .



2. Click the **Templates & Contacts** button. The **Templates** page is displayed.

3. Select the template you want to use.



4. To access the contacts, click the **Beneficiary Template** button under the header.

5. Click the **Edit** button in the shape of a pencil. The **Make a Payment** page is displayed.

All the details of the initial payment are displayed. Edit if needed.

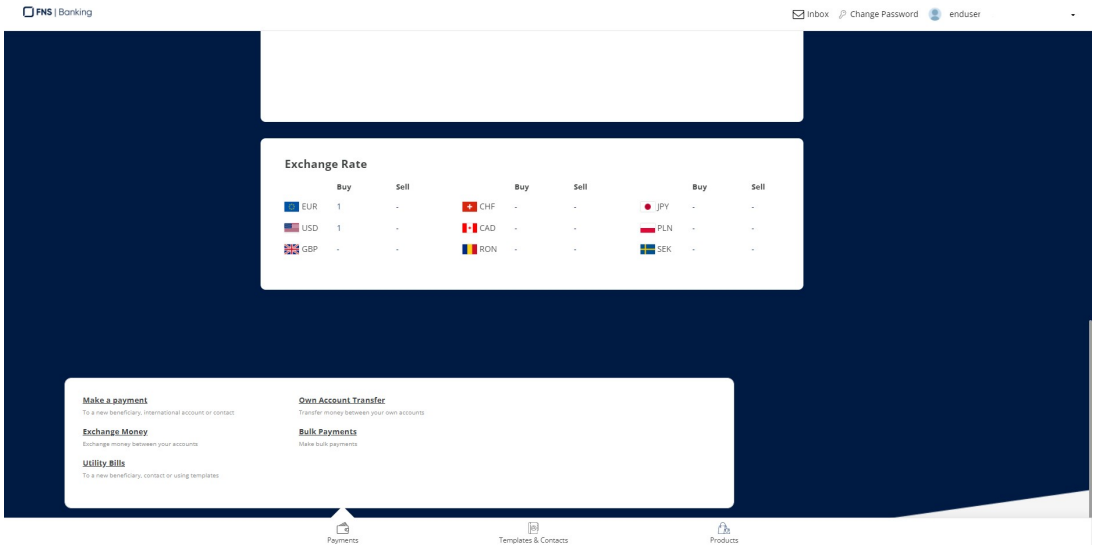
Make an International Transfer

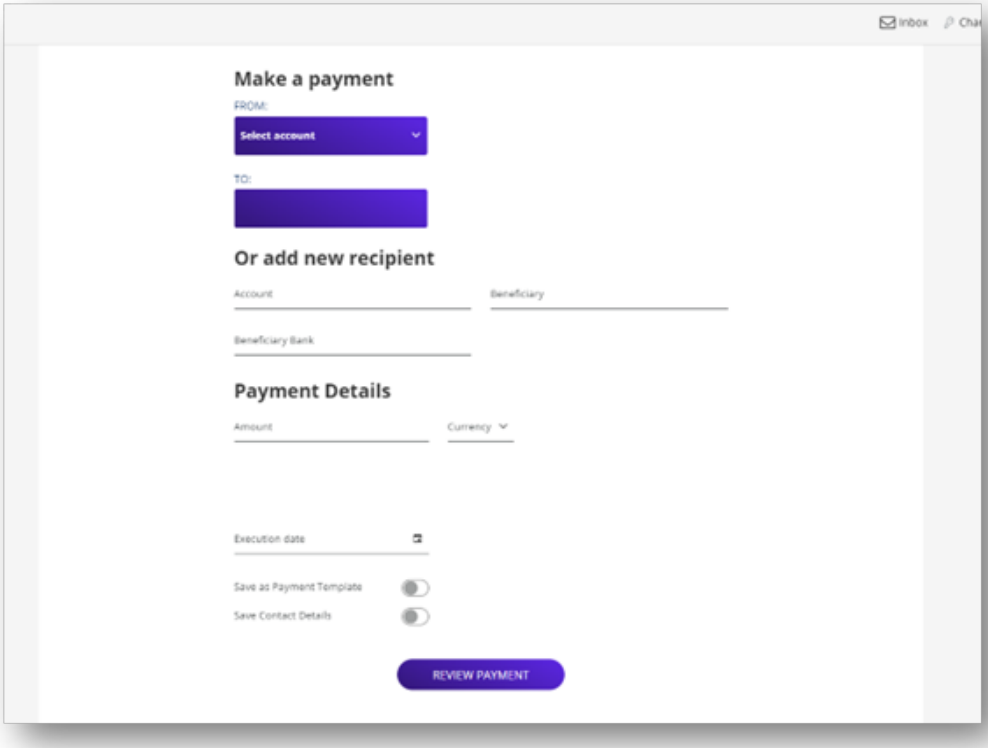
The Online and Mobile Banking solution allows you to make transfers to accounts at banks in other countries that the one you are in. These transfers can be in the foreign currency that you choose. Follow the steps below to make the transfer:

1. From the homepage (or from the account details) select **Payments**.

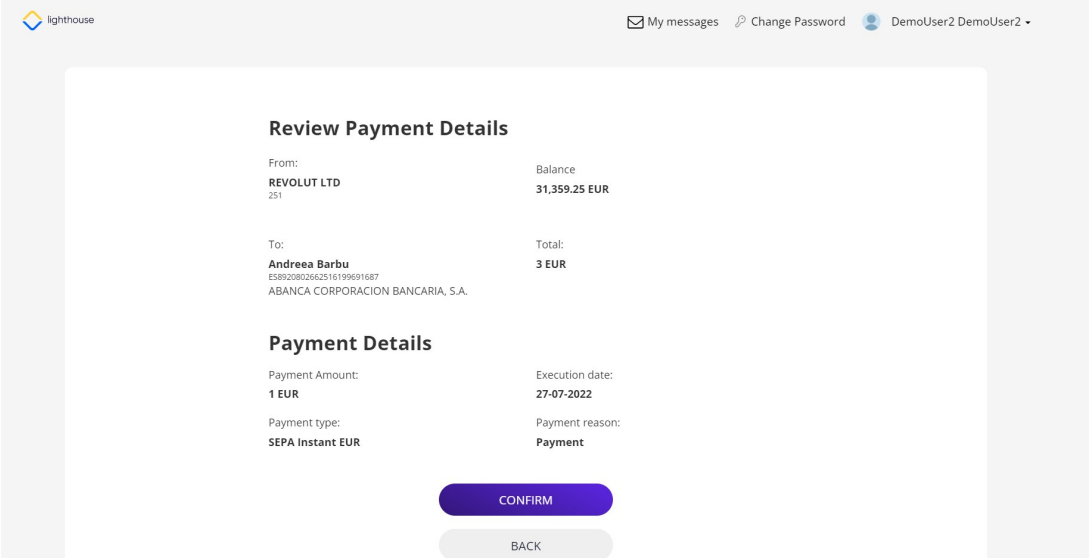


2. Select **Make a Payment** from the list of options.
3. Select the account from which you want to send the funds.
4. Paste or input the account number/IBAN of the person/business you want to send the funds to.
5. Fill in the receiver's name, the name of the bank, and the BIC/SWIFT if necessary.
6. Fill in the amount and select the currency. Depending on the type of the payment (automatically identified by the system), you are required to at least:
    - fill in the transaction details
    - select the details of charges
    - select the execution date
    - select the purpose of payment
    - verify any fees applicable. In certain cases, you can choose different arrival time of the amount, which might incur different fee values.

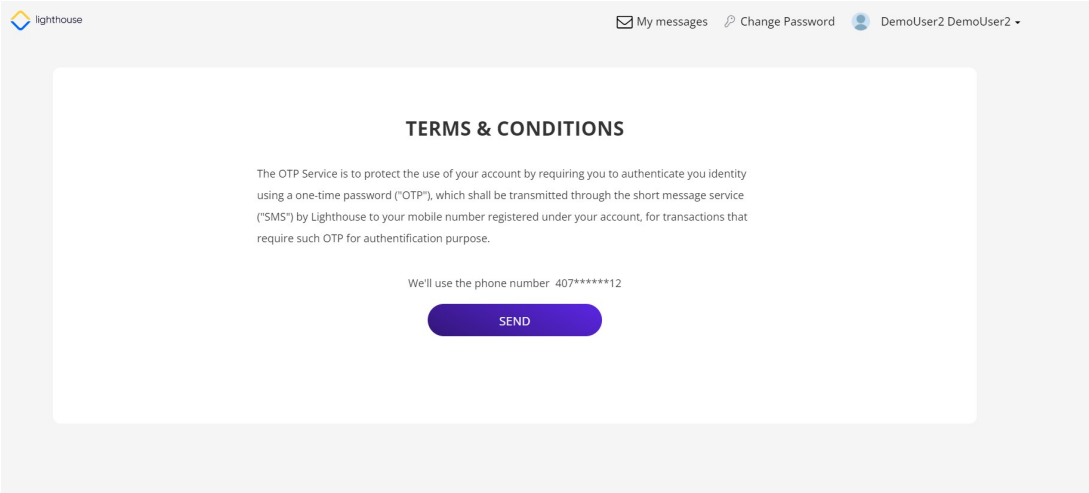
7. Click **Review payment**.



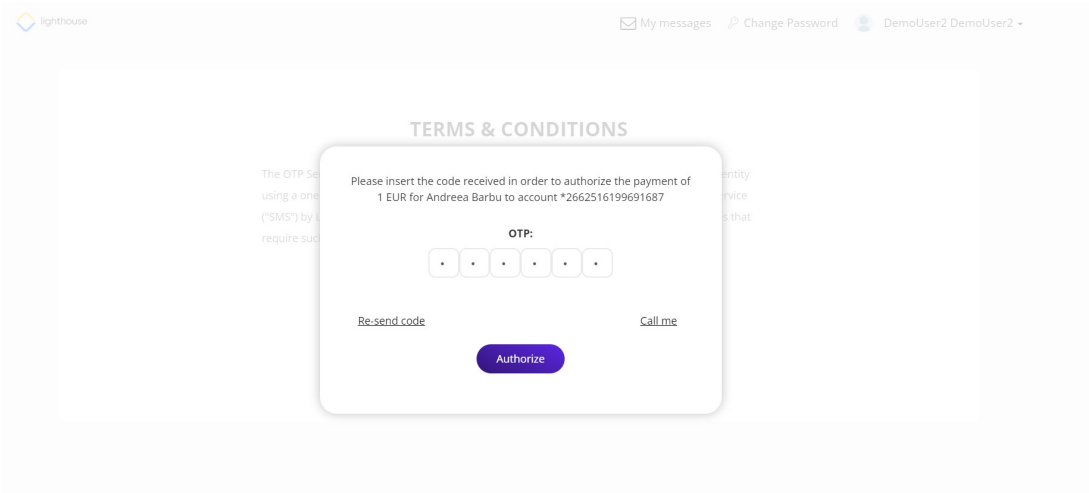
8. Check the details and click **Confirm**.



9. An SMS is sent with an OTP. Click **Send**.

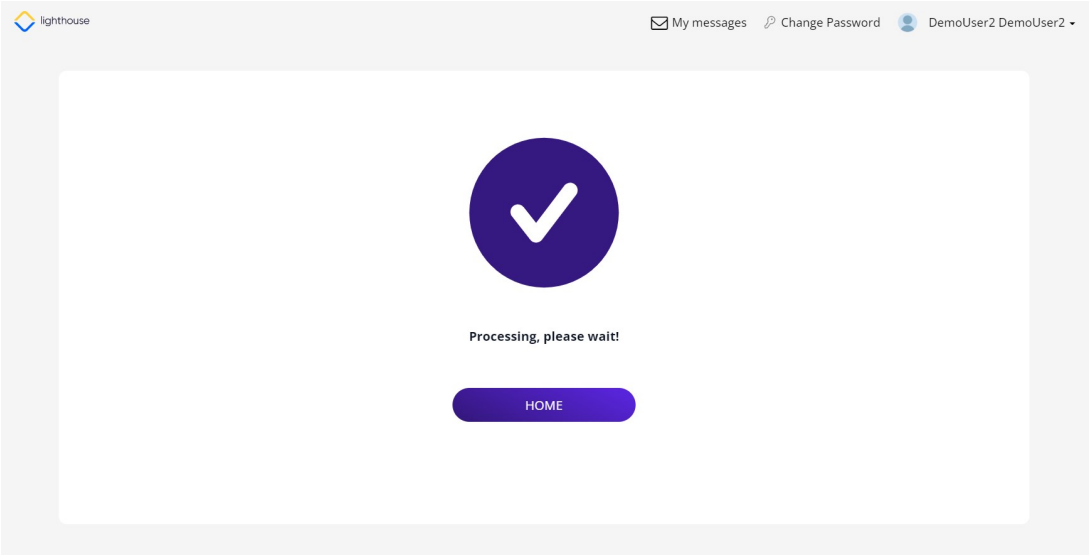


10. Insert the OTP.



11. Click **Authorize**.

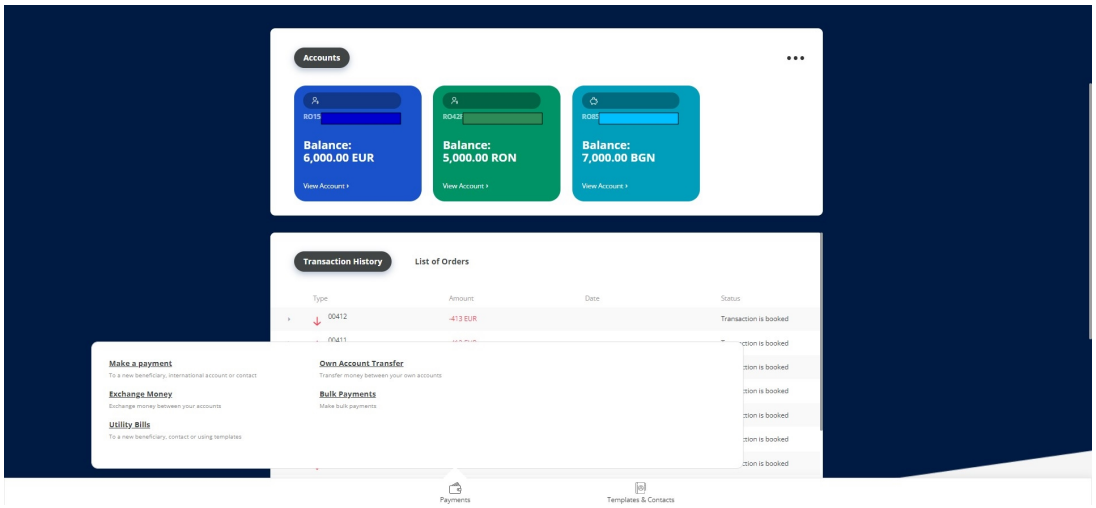
12. A confirmation screen is displayed. Click **Home** to return to the homepage.



Pay a Utility Bill

Another type of payment that ca be done from the Online and Mobile Banking solution is the utility bill. First, you need to create a new utility payment template with your contract details and then you can make the payment. Use the template every month to pay your new bills. The bill amount and due date are automatically updated.

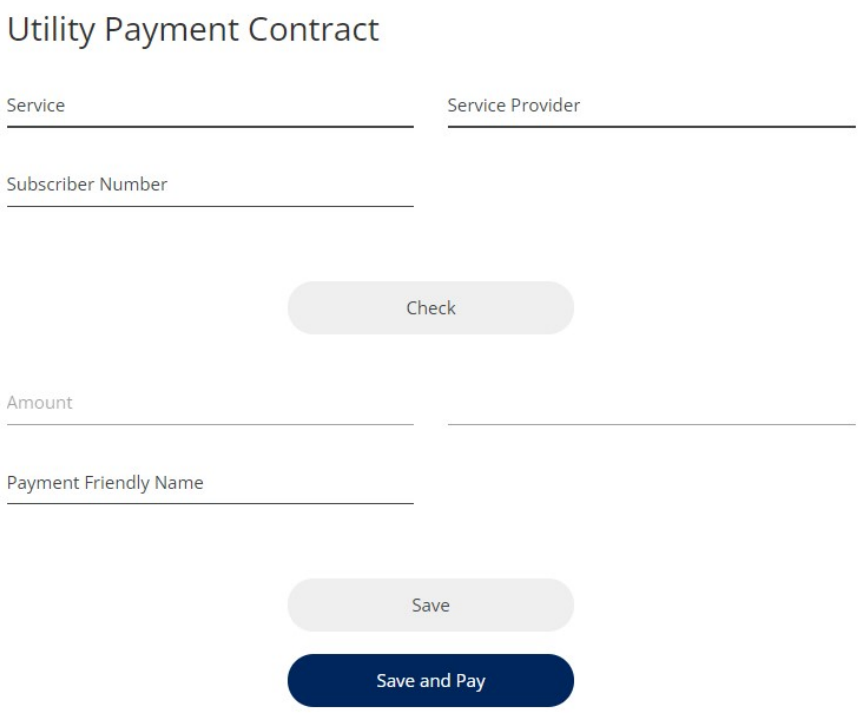
1. From the homepage, click **Payments**.



2. From the module, select **Utility Payments**. The **Utility Payments Contracts List** page is displayed.

3. To create a new utility payment contract, click **New**.

4. Input the utility contract details: service, provider, and subscriber number.



5. Click **Check**. This button checks if the invoice was paid through another channel, and updates the amount and due date values. It uses the subscriber number to make the checks.
6. Insert a name for the entry.
7. Click **Save** to save the modifications made in the contract screen, and then return to the list of contracts.
8. Click **Save and Pay** to save the modifications and go to the utility payment flow. You are directed to the page **Terms & Conditions** and an SMS is sent with an OTP.
9. Click **Send** to receive the code.
10. Insert the code and click **Accept**. If the code is inserted correctly, then the page loads informing you that the utility contract was successfully saved. Click **Home** to access the homepage.

Make a Bulk Payment

Use the bulk payment feature whenever you need to make multiple payments from your account at the same time, either for personal or business purposes. Follow the steps below to make a bulk payment:

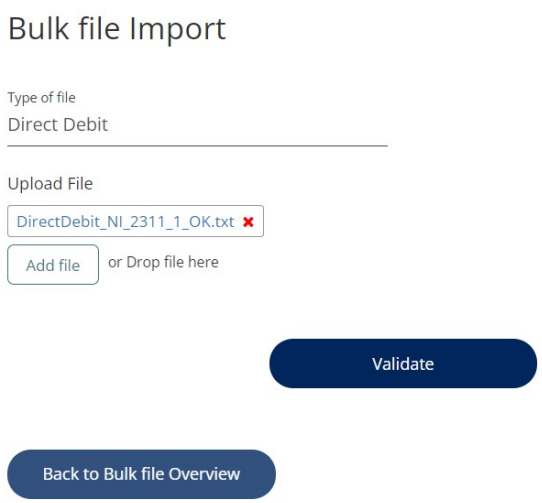
1. On the homepage, click **Payments**.

   Or select an account from where to wire the payment. From the account page, click **Payments**.

2. From the module, select **Bulk Payments**. The **Bulk Payments List** is displayed.

3. To initiate a new bulk payment, from the grid, click **Insert** on the top left-corner of the grid.

4. Access the page **Bulk files Overview**. Select the type of file and upload it.



5. Once you added the file, the **Validate** button is displayed. You can also drag and drop the file directly into the page. Click **Validate**.
6. To proceed, click **Continue to signature**.
7. The **Terms & Conditions** page is displayed informing you that an SMS is sent with an OTP that must be inserted.
8. Click **Send** to receive the email with the code.
9. Insert the OTP. Click **Authorize**. The bulk payment is completed.

Manage Payment Limits

To execute a payment, the amount being transferred must be within your limit. Otherwise, it cannot be processed. For individuals, the following limits are imposed:

- transaction limits;
- daily limit;
- weekly limit;
- monthly limit.

For SMEs and corporate customers, the payment limits are those set within the signature engine where each user has a limit up until they can sign the payment. For larger sums, there can be set rules where multiple users must sign the payment for it to be executed. There are four lists and each user belongs to one. The authorization rules can be built depending on your needs as a corporate customer. One example would be to have 2 users authorize payments over a certain limit, for example $5,000. The rules for limits are added when the account is created. To modify them, contact the Call Center or visit a branch.

Set Multiple Signatures

At account creation, if you have a corporate account, you can set up a rule for transfers exceeding a certain amount to require an authorization from a second user. This would mean that more than one user needs to sign the transaction for it to go through. Follow the steps below to sign a transaction as a second user:

1. From the Homeage, click the **List of Orders**.
2. Select the payment you wish to authorize by clicking the **Pay** symbol.
3. The page **Terms & Conditions** is displayed informing you that an SMS is sent containing an OTP that must be inserted. Click **Send** to receive the SMS.
4. Insert the received **OTP**[1] code.If the code was not sent, click **Re-send code**. The maximum number of retries is 5. The OTP is valid for 15 minutes. .

[1]One-Time-Password. It is a password generated by the system to validate a piece of information or sign a document.

If you have trouble seeing the code, click **Call me**.

> **NOTE**
>
> The functionality of the **Call me** button was not implemented.

5. To verify the OTP inserted, click **Authorize**.
6. Click **Send** to reinitiate the SMS or click the **Try later** button to save the payment and re-initiate it later.
7. The confirmation page is displayed. For joint signature (a third signature is needed), the system displays the information that the payment is posted in the **List of Orders** waiting for the joint authorized approver to sign.
8. Click **Home** to return to the home screen.

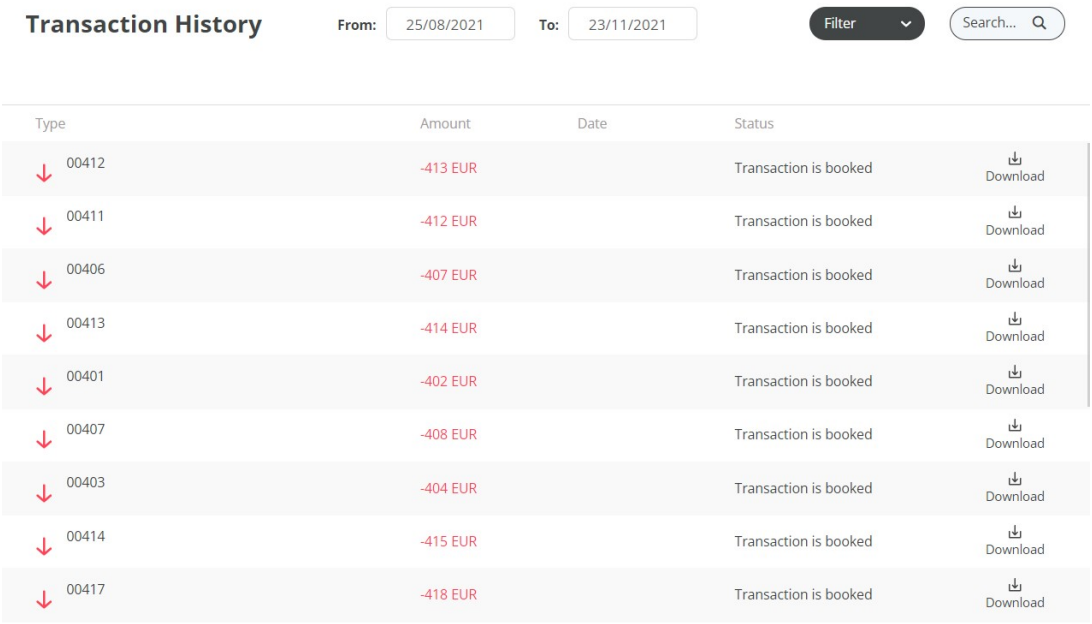
View the Transaction History

The Online and Mobile Banking shows the transaction history for several types of accounts, such as current, basic, and saving accounts, term deposits, or loans, including personal or mortgages.

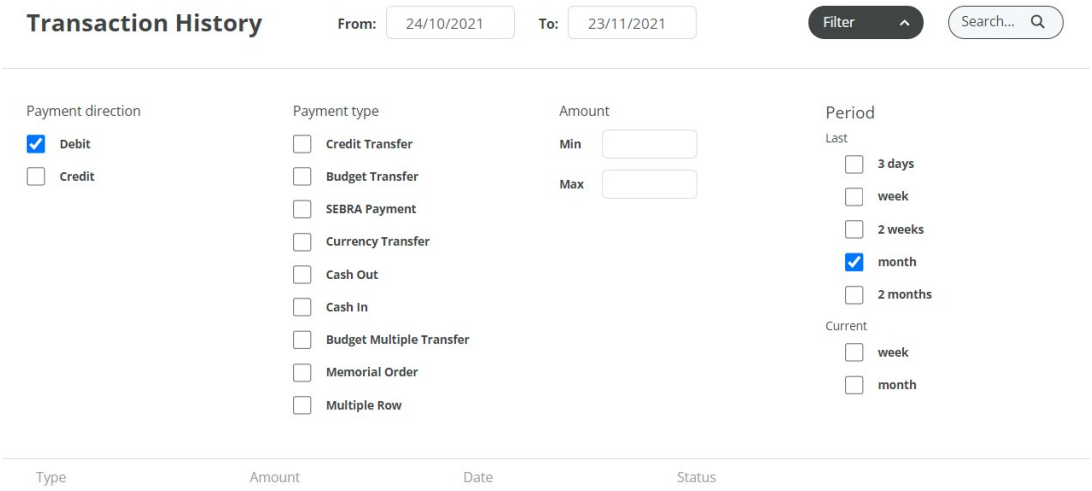
Access Your Transaction History

Follow the steps below to access your transaction history:

1. In the Online and Mobile Banking, scroll down to the history section.
2. Click a row to view the details of one transaction, such as its ID, amount, payment and transaction type, the date, account balance, registration and processing dates.
3. To open the whole transaction history of your account, click the **View more** button.



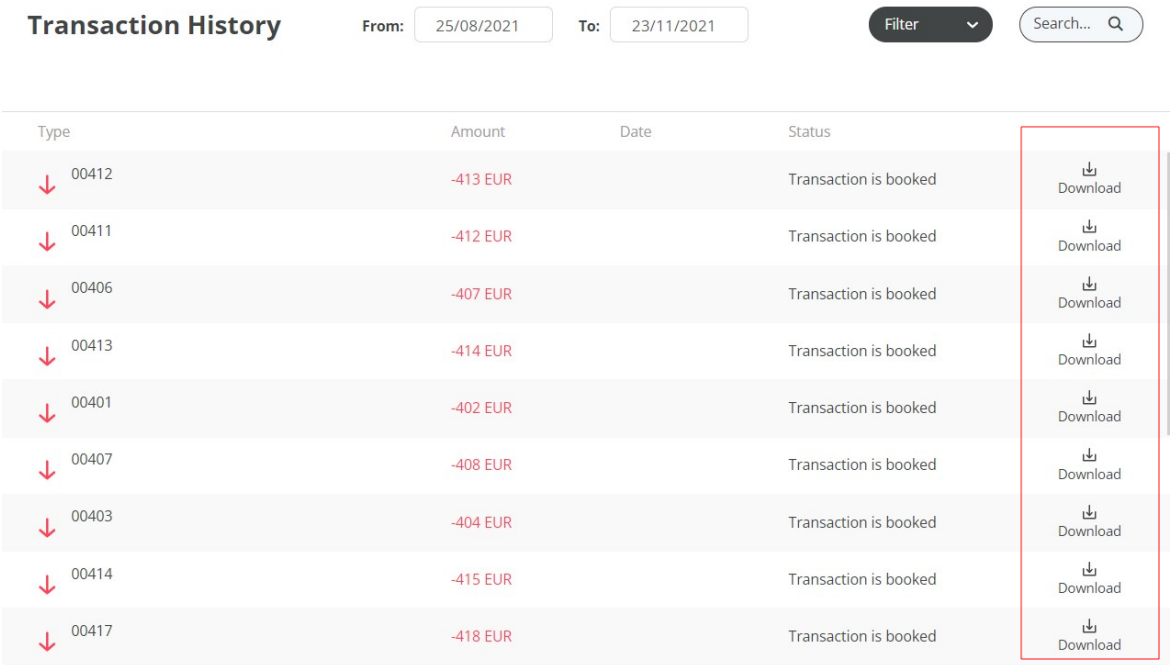
Details about each transaction are displayed, such as the debtor or creditor name, the amount, the date, and the status. You can filter transactions by date, payment type, or period.



In the row of each transaction, the green arrow pointing down signifies that the funds were received, and the red arrow pointing up signifies that the funds were sent to an account.

Download Bank Statements

You can download a bank statement in the form of a .pdf file for each transaction in the history list. Simply click the **Download** button and save the file on your local device.



Request the Account Statement

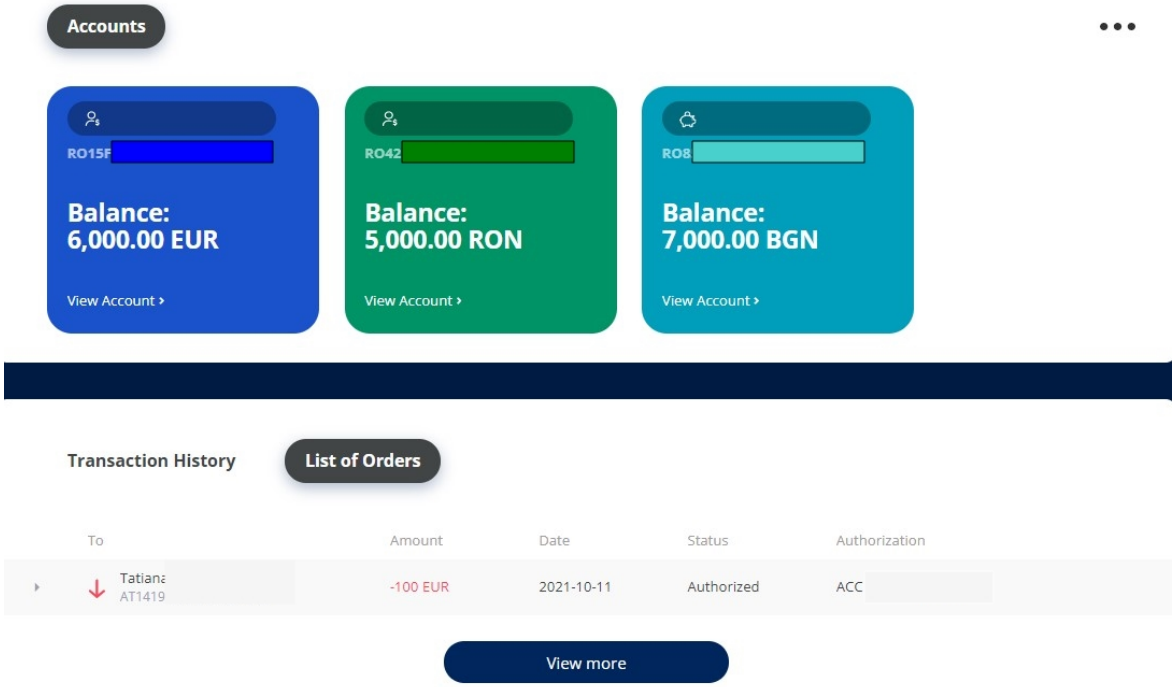
You can view and download account statements for various purposes, directly from the Online and Mobile Banking application. Follow the steps below:

1. From the **Account Detail** section, click **Request account statement**. The **Account Statements** section for the respective account over a specific period of time is displayed.
2. Click **Generate Account statements**. A list of statements is displayed:

- to download a particular statement, click the download icon on the same row as the statement in question.
- to download all the statements, click the button **Download all** at the top of the list.

View List of Orders and Multiple Authorizations

The List of Orders displays all transactions done through the Online and Mobile Banking solution. It shows successfully executed payment transactions, rejected payment orders, payment orders pending for authorization, and scheduled payment orders.

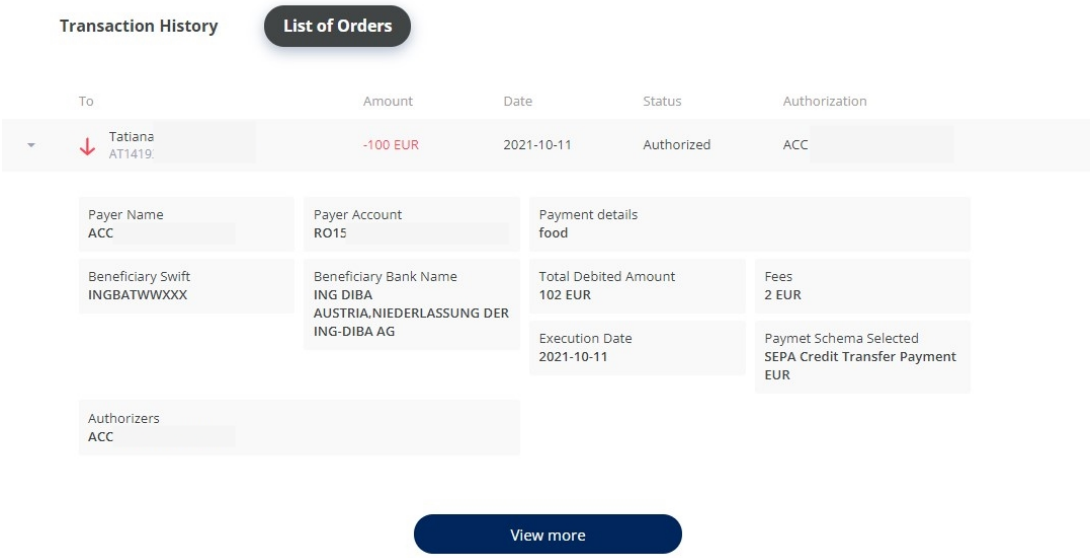


For corporate accounts with multiple authorization, any user authorized on the account can view and sign a payment.

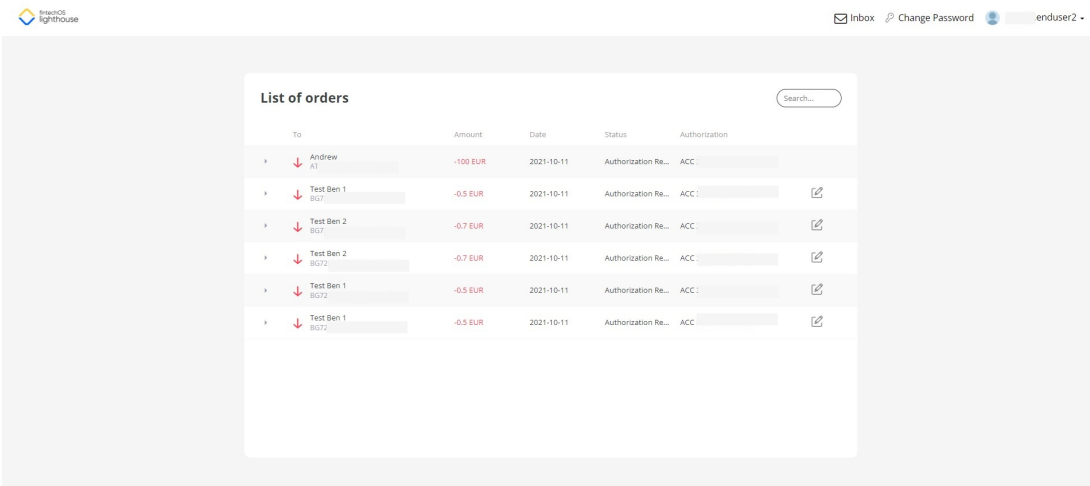
Access the List of Orders

Follow the steps below to access the list of orders:

1. On the main page, scroll down on the section **Transaction History** and **List of Orders**.
2. Click **List of orders**.

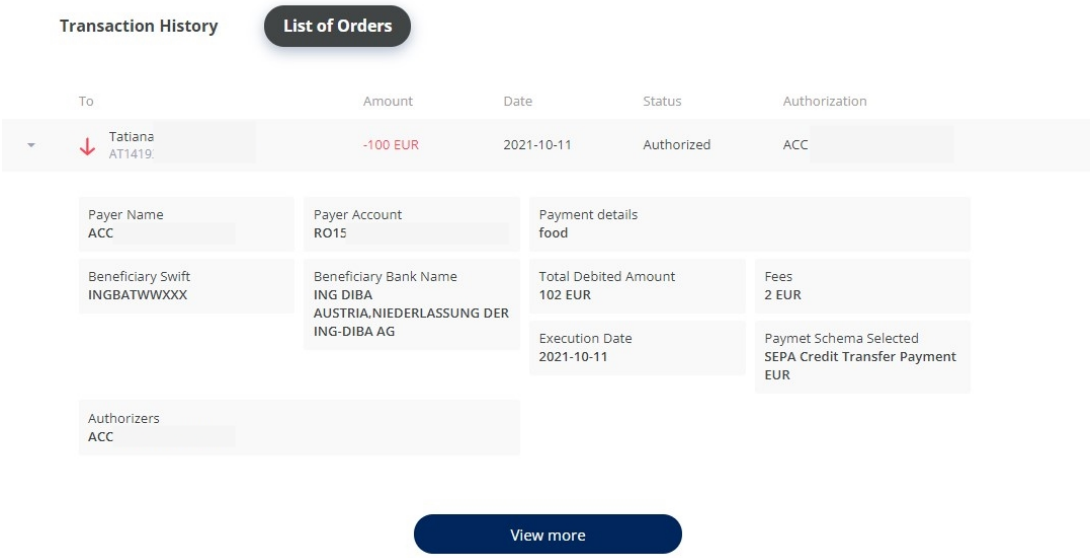


3. Click **View more** to view all the records from the list.



4. Use the **Search** bar on the top right-hand corner of the screen to type in data about a transaction and look for a payment.
5. The page **List of orders** displays information such as the name of the recipient, the amount, the date, the payment status, and the user who signed the payment in case of

multiple authorization. To expand a transaction, click the **arrow** at the beginning of the row. Several more details are displayed, including the name, account, fees, executed date and more.



6. For each transaction, you can either sign the payment, if multiple signatures are needed, or cancel. When signing a payment, an OTP code is sent to your phone number and you must add in the next screen. Note that if a user already signed the payment, the option is no longer available.

   When canceling a payment, a pop-up is displayed. Click **I confirm** to finish the process.

Get the List of Orders

You can save the list of orders by clicking the **Download** button from the top of the screen. The file displays information about your transactions, as well as your account. It shows your name or the company's name, payment types and amounts, recipients, transaction ID, the dates, payment status, and the date when the document was generated.

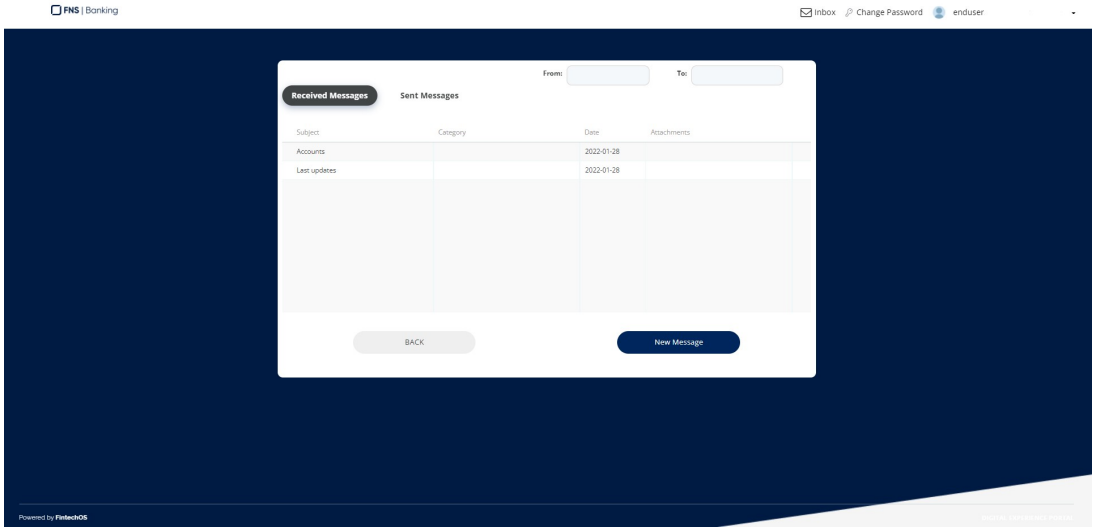
Read and Send Messages

The Online and Mobile Banking application comes with the option to communicate with your bank through in-app messaging. The main advantage of this is that you can contact your bank and send a message without having to place a call.

Types of Messages

In the application, you can access the **Inbox** at the top corner of the interface. It displays the following types of messages:

- the messages sent and received to and from the bank;
- pop-up messages from the bank;
- chats between you and the bank.

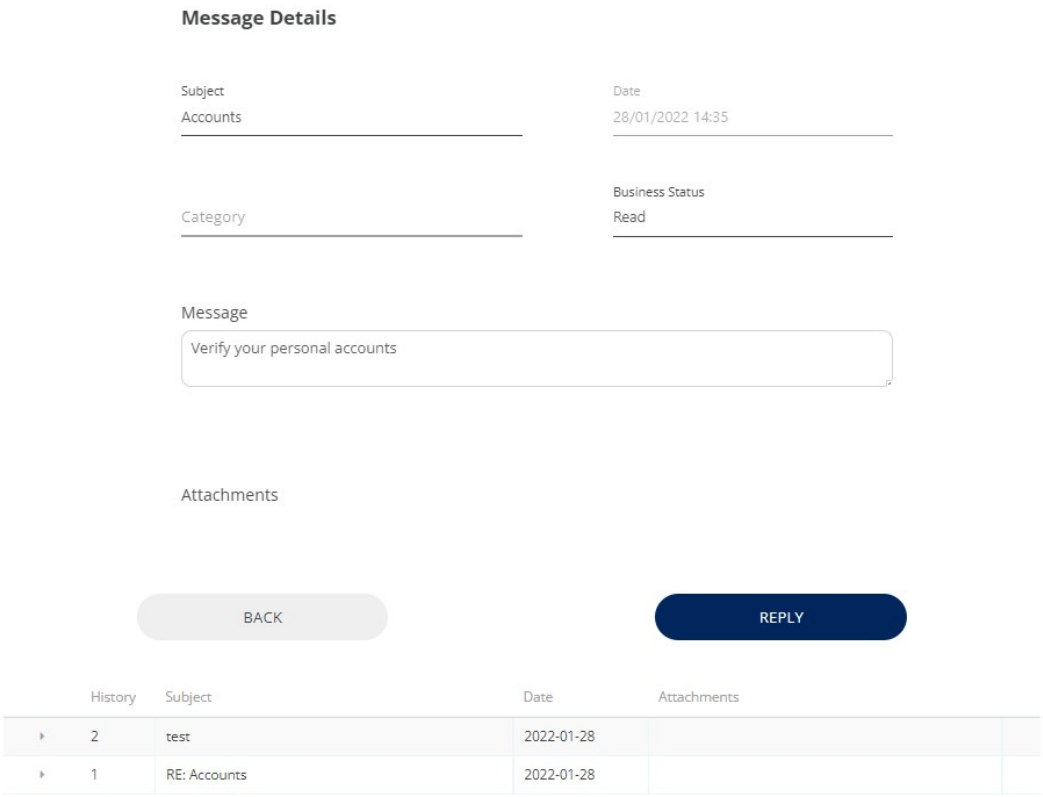


There's another type of message that you can receive from the bank, pop-up messages displayed after login, that you must read and dismiss in order to access the application.

Create and Send Messages

To contact your bank, you can create and send a message directly from the Online and Mobile Banking. Follow the steps below to do so:

1. From the Online and Mobile Banking home screen, click **Inbox** and scroll to the bottom to click **New message**. The screen for the new message opens.
2. Fill in the required information, such as the message subject, category, date, and body. You can also add attachments. Click the **Send** button and a PIN number is sent to your phone number.
3. Add the six-digit code to authorize the message and click **Check**.



To reply to any of the messages in your **Inbox**, click a message to open it and then click **Reply**. Add your reply, and the click **Send**.
